

 script.js

```
const menuToggle =
document.getElementById("menu-toggle");

const navLinks = document.getElementById("nav-
links");

menuToggle.addEventListener("click", () => {
  navLinks.classList.toggle("active");
});

// Simple form submission message

const form = document.getElementById("contact-
form");

const formStatus =
document.getElementById("form-status");

form.addEventListener("submit", (e) => {
  e.preventDefault();

  formStatus.textContent = "Message sent
successfully ✅";

  form.reset();
});
```
